U.S.A.'s Leading Distributor of Solid Waste Equipment

Thinking of moving to automating your refuse system or is your side loader automated truck costing you too much to keep?

---

If the answer is yes, we invite you to explore using the automated front loader.

The problem with the standard side arm automated truck is that it is very expensive to maintain. The front loader automated system is very cost effective due to few moving parts and the low dump height of the container.

The automated front loader is also safe to use and you can easily see what is being dumped into the hopper.

Also the automated front loader allows you to easily manually load debris into the hopper for debris left outside the roll-out cart.

We have several municipal and national accounts using this system, so if you would like a user like please give me a call.

---

# Features and Benefits

---

- ▶ Cost Effective      Standard body and truck
- ▶ Simple to use      No computer boards, etc.
- ▶ Safe to operate      Operates in front of truck
- ▶ Easy to use      Manual load if needed
- ▶ Multipurpose      Use as Commercial F/L
- ▶ Fast      4 Second Cycle Time
- ▶ Economical      Great Back up Unit
- ▶ Strong      Heavy Duty Construction
- ▶ Maneuverable      Short Wheelbase

# Exceptional Short Wheelbase

---

# Easy to Manual Load Debris

# Hydraulic Extended Reach
