# New Joystick Operator Controls from PacMac.

The new mechanical joystick controls are made with high quality materials for a superior smooth operation.

## ▶ Operator Platform Heat Shield

With all of the new chassis PDF exhaust systems, the PacMac Heat Platform shield will protect the operator from excessive heat.

## ▶ New Single Rear Door with Air Latch Kit

The new single rear door offers safety and convenience for the operator.

## ▶ Rear Door Air Latch

No more fighting with Levers with the new PacMac Tailgate Air Lock.

The Air Release is located at the side of the body, out of harms way.

## ▶ Heavy Duty Air Latch

Twin locks secures the rear door and is equipped with a safety pin.

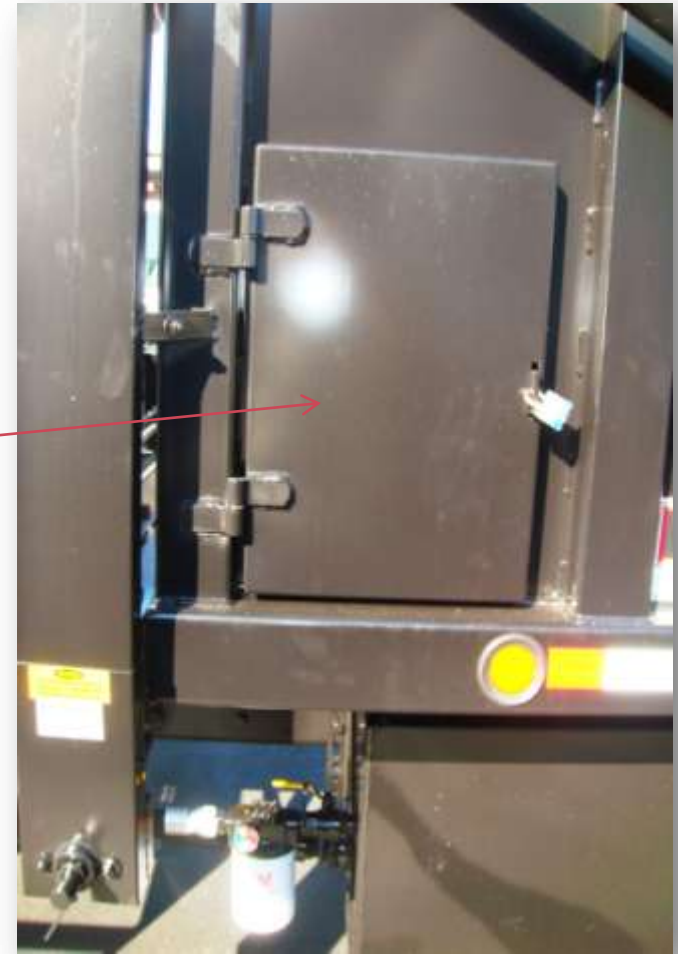

## ▶ Rear Door Support

PacMac has engineered additional rear door support for a long service life.

- ▶ New Full Width Integrated Tool Box

The new PacMac integrated tool box is located in front of the dump body for easy tool storage.

## ▶ New Tarping System

New Tarping System is designed to give the operator a clear view into the body.

We have also designed the tarp system to be either semi-automatic manual crank or you can easily make it fully automatic by adapting an electric motor to the tarp spool.
